

# Mocking backend APIs with

Per Enström

# What I'll talk about

- Mocking backend responses in the browser
- Mocking REST APIs

# What I won't talk about

- Mocking in node (*I might mention it*)
- Mocking in react native
- Mocking GraphQL APIs
- Advanced patterns

# Why would I want to mock my backend?

- Offline
- New functionality
  - New API
  - Updated versions of an API
- Testing

# How it works

# How it works

# How it works

# How to work with it

Demo time!

*You can see the repository demoed at [per.fyi/talks](https://per.fyi/talks).*
